0 INTRODUCTION

The RAFFAELLO application is part of the following full field digital mammography systems manufactured from IMS:

- Giotto Image MD
- Giotto Image SD
- Giotto Image SDL

The RAFFAELLO application is also installed with the biopsy option for the analog mammography system Giotto Image (Biopsy Digit-AM).

The RAFFAELLO software is used for both the Acquisition WorkStation (AWS) and the Review Workstation (RWS); this document contains only the IHE Integration Statement when the Raffaello software is configured for the AWS (this document can be used also in the case in which the Raffaello is installed as part of the Biopsy Digit-AM).
